PROJECTS

GYM GATE

Intuitive web application for managing strength workouts, offering session planning, exercise tracking, and progress visualization. The system enables effective training performance monitoring through a simple interface and clear analytics. Technologies used: **React**, **Express, Node**, **PostgreSQL**, **Docker**

HACKATHONS

MOJE OSIEDLE

Module for the "Karta Łodzianina" application gamifying urban life by rewarding eco-friendly choices, participation in local events, and daily AI-generated challenges. Introduces district and user rankings, strengthening community engagement. The project secured **1st place** at **ŁÓDŹ_HACK** hackathon. Technologies used: **React**, **Docker**

PHARMARADAR

Daily tracker for the pharmaceutical industry, providing pharmacists with notifications about new and withdrawn drugs as well as regulatory changes, eliminating the need to manually browse multiple sources. The project secured **2nd place** at the **HackAndPlay** hackathon. Technologies used: **Django**, **React**, **Docker**, **PostgreSQL**

SYNAPTIS

Web application analyzing patient emotions using biometric wearable data, visualizing stress and emotional states during therapy sessions. Features interactive charts and emotion mapping synchronized with session flow. Awarded **2nd place** at **UBIHACK 2.0** hackathon. Technologies: **Django**, **React**, **PostgreSQL**, **Docker**

COURSES

CCNA Routing and Switching: Introduction to Networks - **Cisco Networking Academy**

Certificates **INF-02, INF-03**
